Software Engineer with 2 years of hands-on experience in building scalable web applications using modern frontend and backend technologies. Strong problem-solving skills with a focus on clean, maintainable code and delivering high-quality software in collaborative environments.

KEY PROJECTS

Serhafen – Customs Operations Application (Service Project)

AndinoLabs

Achievements/Tasks

- Worked on a **customs clearance operations system** used to manage international shipments entering **LATAM regions**
- Built systems to **track each package through customs inspection**, clearance stages, and final **handover to last-mile delivery partners**.
- Developed **scalable React-based operations dashboards** for real-time shipment and customs status tracking.
- Built backend services using **NestJS** to manage customs workflows, package states, and inspection updates.
- Ensured **clean, maintainable, and modular code** to support high-volume package processing.

RetailGenie – Catalog Enrichment Platform (SaaS Product)

Workplace/Company

Achievements/Tasks

- Worked on a **SaaS-based catalog enrichment platform** supporting multiple e-commerce clients.
- Implemented **client onboarding workflows** allowing users to upload product data such as images, titles, descriptions, and attributes
- Built frontend interfaces using **React** to handle large-scale data rendering and user interactions.
- Developed backend APIs to **process, validate, and enrich product content** based on selected marketplaces.
- Ensured **scalability, performance, and maintainable code structure** for growing client usage.

EDUCATION

Master's of Computer Applications

Nishitha degree and pg college

08/2022 - 04/2024

Nizamabad

Bachelors of science

Nishitha degree and pg college

07/2019 - 07/2022

Nizamabad

SKILLS

React.Js

NestJs

JavaScript

Bootstrap5

HTML

CSS3

Tailwind CSS

PostgreSQL

MySQL

AngularJs

TypeScript

Express.Js

AngularJs

MongoDB

Figma

UI/UX

ShadCn/UI

Material UI

AWS

CI/CD

WORK EXPERIENCE

Associate Software Engineer – Andinolabs
(06/2024 - Present)

- Worked as a **Full Stack Developer** with a strong focus on **frontend and backend development**.
- Contributed to the design and development of **scalable web applications** using **React** for frontend and **NestJS** for backend services.
- Built **secure authentication and authorization systems from scratch**, ensuring maintainable and reusable code architecture.
- Collaborated with cross-functional teams to deliver production-ready features across multiple projects.
- **Clean code principles**, ensuring readability, maintainability, and performance optimization.

Internship Full Stack Developer- Yantram Medtech Pvt . Ltd
(09/2023 - 12/2023)

- Developed an Inventory Tool Management System during internship, proficient in **Front-end** and **Back-end** technologies.
- Optimized website navigation and user experience through the creation of a sleek and intuitive user interface using **React.js**
- Conducted rigorous testing of **REST APIs** endpoints using Postman to ensure robust security and reliability.
- Managed and maintained the system's **MySQL** database, ensuring efficient storage and retrieval of crucial inventory data.
- Gained knowledge as a new full stack developer, mastering new frameworks and adapting to the office environment.

Front End Developer- Callensights (04/2024 - 05/2024)

- Developed interactive and user-friendly dashboards for Callensights, a call analysis company utilizing generative AI, to provide clients with insightful data visualization.
- Utilized frameworks such as **React.js** to create interactive and responsive dashboard elements, enhancing user experience across various devices
- Collaborated closely with the design team to translate wireframes and mockups into functional prototypes.
- Conducted regular code reviews and optimizations to improve performance and maintainability.
